

# TIGERmetriX

The MPSI® TIGERmetrix product translates the latest release of census TIGER® files into common geographic information system (GIS) formats. The product tiles the layers at the national and county levels making the files easy to use. This release contains all of the positional accuracy improvements that have been made to the TIGER files to date.

## Features:

- Comprehensive street data for the entire United States PLUS census polygons, city boundaries, school district boundaries, legislative districts, places and more
- Easy access to TIGER street files through common GIS applications such as *ESRI*® and *MapInfo*® data
- More than 60 layers available
- Seamless integration with other MPSI products

## Benefits:

- Saves you time
- Low cost solution to your mapping needs
- Access free technical support provided by highly qualified technicians

MPSI offers additional products that can easily integrate into TIGERmetrix, providing expanded capabilities. These include traffic data and comprehensive demographics. Contact MPSI today to see how you can start benefiting from TIGERmetrix and other products from MPSI.
